Paul Timothy Deximo Caliguip

Aspiring Agentic AI Engineer-Freelancer

Taguig, National Capital Region, Philippines

Summary

I am an aspiring Agentic AI Engineer and freelancer with a background in engineering and software development. Over the past few years I've helped design, build and test software products in corporate using Agile methodologies. I am now shifting my focus to agentic artificial intelligence—creating autonomous agents that can perceive, decide and act to solve complex problems. My interests span prompt engineering, large language models, reinforcement learning and multi-agent systems. Leveraging experience with programming languages such as Python, JavaScript and Java, I enjoy exploring new technologies and applying them to real-world challenges. I'm open to opportunities that allow me to collaborate, learn and contribute to AI projects and to develop my skills as an agentic AI engineer in the service of others.

Experience

Software Ventures International

2 years 1 month

Junior Programmer

March 2023 - December 2024 (1 year 10 months)

In this role, I gained experienced in IT Operations, software engineering, PowerBI and SQL Reports. I also demonstrated natural capacity for the field and received ovations in assessments.

Programmer Trainee

December 2022 - March 2023 (4 months)

Pasig, National Capital Region, Philippines

I trained in Software Development majoring in Java on foundational and practical concepts for contributions in the corporate departments.

Education

University of the Philippines Diliman

Bachelor of Science - BS, Civil Engineering · (June 2011 - June 2018)
